

Introducing EAC Instructor

New course-level assessment reports

EAC Instructor is a tool available for Blackboard Learn SaaS environments. EAC Instructor streamlines and simplifies course-level reporting for faculty on rubrics and exams to promote continuous improvement endeavors. Providing real-time insight into student strengths and weaknesses, EAC Instructor turns Blackboard's course-level rubrics and exams into actionable data to help faculty improve student success.

Highlights of EAC Instructor

Streamline Processes

Help faculty leverage current teaching and learning activities already happening in Blackboard Learn SaaS for internal reports on teaching effectiveness.

Seamless Integration

Simplify assessment reporting by integrating directly into Blackboard Learn SaaS and existing workflows.

Detailed Rubric Analysis

Get more detailed rubric data than ever! Robust reliability statistics including KR-20s and Point Biserial Correlations for instructor rubrics to help improve the quality of assignments and projects. See performance results by roster, by rubric criterion and distribution across levels of achievement, and by individual student on each criterion.

Detailed Exam Analysis

Get more detailed exam data than ever! Robust test and item reliability statistics including KR-20s, p-Values, and Point Biserial Correlations to identify poor questions and answers, review group and individual student performance by question, and easily identify students to remediate and content to review.

Cross-Course Reporting

For faculty who teach multiple sections or collaborate across sections and courses over time, combine common exams and rubrics across Blackboard Learn SaaS courses into a single report for more holistic measures of student performance and reliability.

At-Risk Students

Efficiently identify course-level at-risk students and discover their specific areas of strengths and weaknesses on course content.

Data Visualizations

Pie charts, bar charts, and other visualizations to make sense of mission-critical student learning data.

Shareable Reports

Download exam and rubric reports and graphs in Word, PDF, Excel, JPEG and PNG to share with colleagues and easily include in annual performance reviews, send to curricular committees, and use to improve teaching and learning.
